

Pardeep Singh Rawat

MERN stack developer

✉ prdeep.rawat1999@gmail.com ☎ +91 8968861229 📍 Chandigarh, India

🌐 linkedin 📄 LeetCode 📁 Portfolio

Professional MERN Stack Developer with a strong track record of building scalable, maintainable applications from the ground up. Skilled in developing reusable codebases and delivering high-performance solutions for both on-premise and cloud environments. Adept at translating UI/UX designs into responsive front-end applications with seamless integration to robust back-end services. Known for collaborating with cross-functional teams to execute ideas and deliver end-to-end success while continuously improving development processes.

PROFESSIONAL EXPERIENCE

08/2021 – Present
Mohali, India

Orion esolutions pvt ltd, Software Engineer

- Contributed to React and Next.js projects through coding, debugging, and mentoring juniors.
- Built fast, responsive web apps meeting design and performance goals.
- Collaborated with QA teams to ensure quality and functionality.
- Researched new tools and tech to improve development processes.

SKILLS

Web Technologies — React js, Next js, | Node js | Zustand | Redux, Redux- | toolkit | JavaScript, TypeScript | HTML5, CSS3, SCSS | Bootstrap, Tailwind, MUI | Sitecore, Wordpress, Strapy | Git, Bitbucket

Coding Tools — Cursor | VS Code | Copilot++ | Claude, Gemini, ChatGPT,

Database — MySQL | MongoDB

API Tools — Postman | Insomnia | Swagger

Testing Library — Jest | React dev tools | Chrome dev tools | Google Lighthouse

Others — Figma | Jira | Trello | Slack | Teams

EDUCATION

2022
Chandigarh, India

Master of Science | Information Technology, Panjab University

2020
Chandigarh, India

Bachelor of Computer Applications | Computer Applications, Panjab University

PROJECTS

Italki, Web Application

Italki is an online language learning platform that connects students with language tutors from around the world. Users can choose from a vast selection of over 150 languages, including popular options like Spanish, French, and Mandarin, as well as less common languages such as Basque and Tsonga. The platform allows for flexible learning through one-on-one lessons, where students can book trial classes or regular sessions with tutors of their choice.

Technologies - React, PHP, Laravel, AWS

CBG - Cook and Boardman Group

Developed a suite of solutions for door and opening integration, including an AI-powered system for extracting opening data from architectural PDFs, a PDF visualizer for reviewing and validating extracted information, and a centralized platform for managing multiple concurrent projects. These tools streamline data processing, enhance accuracy, and improve coordination across large-scale security and access control implementations.

Technologies - React, Dot Net, AWS

Tricera, Web Application

Tricera Print is a boutique offering premium bespoke printing, mounting, and framing services. Specializing in fine art printing, scanning, and art reproduction, it caters to both individual artists and businesses.

Technologies - React, Node, Wordpress , AWS

Voagents

VoAgents is an AI-powered voice assistant platform that automates and humanizes inbound and outbound calls for businesses across industries such as healthcare, real estate, and e-commerce. The platform enables natural, context-aware conversations in over 27 languages, with features like emotion detection, adaptive responses, and enterprise-grade security. It includes a no-code interface for easy deployment, ensuring lightning-fast performance, unlimited scalability, and continuous improvement through machine learning—helping businesses deliver 24/7 customer engagement with intelligent, human-like care.

Technologies - Nextjs, Custom GPT, AWS

The Boston Consulting Group, Inc: BCG-XMC Migration, Web Application

BCG is a global consulting firm that partners with leaders in business and society to tackle their most important challenges. Some of the domains were in React js, that needs to be upgrade to new technology that is Next js.

Technologies - Next, Sitecore xmc, Vercel

Maryville, Web Application

It's a project based on Learning. User is enrolled in a pathway and the pathway consists of knowledge milestones & demo milestones. After completing the pathway, the user earned a skill. There is also a visualization app where you can see modules.

Technologies - React, Java
